CDQ All Time Right

Master Your Data.
Empower Your Organization.

The first SaaS solution designed for MDM professionals to take **full control of business partner master data** and bring real horizontal **value of all-time-right data** for the entire organization.

One-stop shop for **accurate**, **validated**, and **trusted** business partner master data

Master data chaos costs time, money, and nerves. **CDQ All Time Right** puts an end to the frustration of poor-quality data, never-ending yet always-unexpected errors, and constant fixes.

Continuously

Real-time

In your system

CDQ All Time Right features

Faster Data Creation

Web search experience for B2B partner data creation via one interface

One-click BP Lookup for first-time-right data entry directly from trusted sources

Golden Record augmenting best-of reference records, with attribute-level transparency to track data origins

Automated Data Observability

Real-time monitoring for proactive handling of data updates

Entity resolution and duplicate detection using fuzzy matching, phonetic algorithms, and custom deduplication rules

Adjustable configuration for workflows customization

Data Governance & Compliance

Continuous high quality of master data for solid and sustainable data governance

Real-time monitoring for tax IDs, legal identifiers, and VAT registrations

Audit trail capabilities for tracking and verifying historical data changes

Agile Validation & Enrichment

Real-time validation by integrated official sources and industry-specific insights from the CDQ Intelligence Database

Data Quality Rules Engine available out-of-the-box

Tax and Business ID qualification with 100% EU VAT coverage and audit trail

Seamless Integration & API Capabilities

RESTful API integration into existing data management workflows

Plug into ERP, CRM, and SRM systems with minimal setup requirements

Out-of-the-box SAP integration

Trusted Data Ecosystem

GDPR-compliant data sharing network via the CDQ Data Sharing Pool

Premium peer-validated data for over 200 million business partner records

Improved data quality, saved costs, and reduced time through a collaborative approach to master data

CDQ All Time Right reframes master data from back-office challenge to a core business enabler

Whether you're preparing for SAP S/4HANA migration, struggling with messy, error-prone data, or aiming for seamless automation, CDQ All Time Right gives you the confidence of having accurate, consistent, and reliable business partner data, ready to drive your business forward with more speed, efficiency and trust.

Because when your master data is right, everything else runs smoother.
That's the power of MDM fueled by all-time-right data.

CDQ All Time Right benefits
